3. Reasons for Differences between Consolidated Earnings Forecast and Actual Results for First Half as well as for Modifications to Consolidated Earnings Forecast for Full Year

The consolidated net income for the first half of the fiscal year ending in March fell below the previously announced forecast value due to the recognition of the extraordinary loss described in Section 4 below. In our outlook of the earnings for the full fiscal year ending on March 31, 2014, the net sales, operating income and ordinary income are expected to exceed the previous forecast values by ¥20.0 billion, ¥1.5 billion and ¥2.0 billion, respectively in response to favorable performance in the Medical segment. On the other hand, the consolidated net income is expected to be ¥17.0 billion lower than the previous forecast due to the recognized extraordinary loss described in Section 4 below.

4. Recognition of Extraordinary Loss

Lawsuits have been filed against the Company, claiming damages allegedly caused by its false entries in securities registration statements, securities reports, semiannual reports, quarterly reports and internal control reports. Mainly with regard to the three pending cases involving such lawsuits, which were announced in the timely disclosure dated August 1, 2012, “Notice Concerning the Filing of a Damages Lawsuit against Olympus,” the timely disclosure dated November 13, 2012, “Notice Concerning the Filing of Lawsuit against Olympus Corporation,” and the timely disclosure dated July 16, 2013, “Notice Concerning the Filing of Lawsuit against Olympus Corporation” (whose claimed damages are ¥6,611,669,900, ¥20,841,722,483 (an amount after the expansion of claims and partial withdrawal of the claims) and ¥16,832,345,953, respectively), the Company decided to recognize an extraordinary loss by setting aside the ¥17.0 billion provisions for losses on lawsuits in view of their progress and other factors.

Note:

The above-stated earnings forecast is based on the information available on the release date of this material. Risks and uncertain factors concerning the world economy, competitive situation, exchange fluctuations and others in the future may result in significant differences between the stated forecast values and actual results.
