

OUR PURPOSE

Making people's lives healthier, safer and more fulfilling

Ever since it was founded one hundred years ago—with the goal of mass-producing microscopes in Japan— Olympus has continued to make great contributions to society through its businesses. Throughout the years, our products and services have not only become essential parts of medicine and life sciences, but have also proved to be indispensable in the fields of manufacturing and infrastructural maintenance, as well as in preserving the precious moments discovered in people's daily lives.

We have embarked on a journey which will transform Olympus into a global medtech company. Now is the time for us to identify the right path that will lead us to a future in which we continue to make society better.

We invite you to join us on our journey. Please look forward to Olympus delivering on its promises and soaring to new heights.
