ESG Strategy

Materiality Topics at Olympus

Olympus endeavors to build a strong and sustainable organization by working with regulators and stakeholders to remain a company with integrity and transparency. Meanwhile, we actively aim to contribute to the realization of Our Purpose of "making people's lives healthier, safer and more fulfilling," in order to become a leader in the healthcare industry as well as in ESG. We have positioned the promotion of ESG as one of our priority initiatives in the company strategy, and enhance the affinity and consistency between our ESG strategy and company strategy, business strategy, and functional strategy to levels greater than previously seen.

Aiming for Both a "Sustainable Olympus" and a "Sustainable Society"

Meeting the expectations of

Olympus has developed its business activities based on the legacy and in line with its founding spirit of "Create something truly original, and propose new values to society." We believe that contributing to the sustainable development and progress of the globe and society based on this founding spirit, by putting Our Purpose into practice, will allow Olympus itself to achieve sustainable growth and value creation. We are aiming to achieve sustainable growth by creating a cycle whereby profits generated through our business activities are reinvested to create new value in accordance with our corporate principles and subsequently generate further profits. At Olympus, we believe it is important to engage in dialogues with our stakeholders-

including customers, patients and their families, business partners. shareholders and investors, employees, local communities, and international society. It is also important to use these dialogues to appropriately understand their requirements and expectations of Olympus, in order to contribute to the sustainable development and progress of the world and of society. The environment surrounding corporations is changing from day to day, and society is also undergoing major changes. One of the major goals in sustainability at Olympus is to work to address various social issues in our capacity as a MedTech company while catering to the expectations

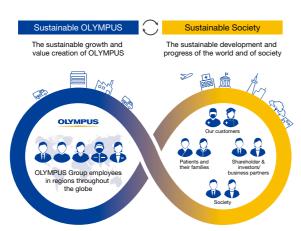

Sustainable Olympus: Putting Our Purpose into Practice

Contribute to improving the QOL of patients through value co-creation alongside physicians and medical institutions.

Olympus' medical business commenced with its development of the world's first gastric camera suitable to practical applications. This development was a direct response to the desire among physicians for a means for the early detec tion and diagnosis of gastric cancer to achieve reductions in the associated mortality rates. From that time, through to the present, Olympus common purpose in developing endoscopes and

Delivering outstanding products and technologies and training healthcare professionals in their safe and appropriate application facilitates both the "early diagnosis" of diseases as well as "minimally invasive treatments," to reduce the burdens on patients and thereby contribute to improvements in patient quality of life (QOL).

of innovations in the domain of medical devices made possible by collaborations with healthcare professionals, with the aim of improving

Meeting the expectations of

Sustainable Society: **Contributions to the Sustainable Development Goals (SDGs)**

Decipher and elucidate the relationship between our business activities and the SDGs and establish business goals to which those activities should contribute

Olympus will engage, through its business activities, with the resolution of environmental and societal issues facing the world while contributing to the realization of a sustainable society, which is the objective of the SDGs* oward this end, we have deciphered and elucidated the particular relationships between the SDGs and our own business activities, in the process identifying 13 goals closely related to Olympus' operations. Of these 13 goals, the SDG to which our degree of contribution through our business is greatest is goal 3 "Good health and well-being," and we will actively contribute to the resolution of multiple societal issues centered on "health" as a global MedTech company.

*1 Sustainable Development Goals (SDGs): Common goals for the international community set by the United Nations toward the achievement of a sustainable world by the year 2030

Materiality Topics at Olympus

In conjunction with the formulation of the company strategy, we reviewed our ESG strategy in fiscal year 2023. In the review of materiality, we identified Six Focus Areas and 25 Materiality Topics falling under these Focus Areas, based on fresh input from our stakeholders, societal expectations and requirements, trends within the MedTech industry, and analyses of risks and opportunities from the perspective of sustainability*2. In the process of identifying these 25 Materiality Topics, mapping of these topics onto the two axes of "importance to stakeholders" and "impact on Olympus' business (importance to Olympus)" is carried out, with Olympus then assigning these to three levels of priority: Top Priority, High Priority, and Others. KPIs have been set for those Materiality Topics that have been positioned as particularly important Top Priority topics, with progress toward their achievement being actively managed. Progress statuses and new initiatives will also be actively discussed at ESG Committee and Board of Directors' meetings.

*2 Since identifying four materiality items in fiscal year 2020, we revised these to five materialities in fiscal year 2022 with the addition of "Carbon Neutral Society and Circular Economy." In the evision of fiscal year 2023, the existing six important ESG areas and five materiality items were realigned into Six Focus Areas

STEP ()

Identification of Social Issues

Listing up of social issues based on an outside survey on changes in sustainability trends since previous identification, as well as various FSG-related frameworks and ESG survey assessment items

STEP 02

Assignation of **Priority to Social Issues** by Importance to Stakeholders

Conducting of interviews with medical institutions. government agencies investors, and ESG assessment bodies Assignation of priority to issues in terms of their importance to stakeholders

STEP 03

Assignation of **Priority to Social Issues** by Importance to Olympus

Assignation of priority to issues in terms of impact on Olympus' business

STEP ()4

Materiality Identification

Identification of materiality items through processes including deliberations by the Group Executive Committee and the Board of Directors (proposed and approved as part of company strategy). In addition, drafting of a Materiality Matrix with assigned priorities to the identified social issues from the perspective of the two axes

Materiality Matrix

Innovation to improve manufacturing process

Business Impact

ESG Strategy Structure

Tax transparency

To enhance Olympus' ESG initiatives, we undertook a reconsideration of our promotion structure for sustainability strategies at the Group level in fiscal year 2023. We then established a new sustainability governance system in April 2023. Under this governance system, an "ESG Committee" has been put in place, with the ESG Officer having ownership, and the committee comprised of heads of respective businesses and functions. The ESG Committee implements sustainability strategies, discusses important measures related to materiality, and monitors progress against goals. Furthermore, we have established thematic working groups under the ESG Committee, such as those on the environment and human rights, to study and share information on measures that need to be taken across functions.

Corporate citizenship and philanthropy

The ESG Officer reports to the Group Executive Committee and the Board of Directors on the implementation status of the sustainability strategy as well as on outcomes and attendant challenges. We thus ensure that a proper and appropriate sustainability strategy is implemented based on the guidance and advice of the Group Executive Committee and the Board of Directors.
