Subject: Notification of End of Support for Olympus® Products Software

Dear Customer:

This letter serves as notification of an End of Support* for the Olympus products listed below. The effective date shall be the date of issue of this letter.

■ **End of Support***

“End of Support” refers to the point at which a product no longer receives security patches, updates, or version upgrades because its underlying software or components are no longer supported. For the products listed herein, Olympus will no longer provide support for these products because the underlying software components in Olympus products are no longer being supported by their vendors.

■ **Guidance for Managing “End of Support” Products**

As stated in the IMDRF's Guidance for Medical Device Cybersecurity, stakeholders (e.g., medical device manufacturers (MDM) and healthcare delivery organizations (HDO)) within the healthcare industry have a shared responsibility to provide for the security of medical devices.

Olympus recommends replacing “End of Support” products with the latest available products. Please reach out to your Olympus sales representative or Customer Service Center for more information.

However, if you choose to continue using “End of Support” products, Olympus recommends that customers continue to follow cyber security best practices to help secure their environment. These practices may include but are not limited to implementing appropriate access-control mechanisms, establishing user procedures, and providing adequate training to protect medical products from unauthorized access. Additionally, Olympus provides a General Hardening Guide located on our Global Product Security Website.

[Olympus Product General Hardening Guide](#)

If we become aware of a critical vulnerability related to Olympus products in the market after end of support, we will assess the risk and notify you of any recommended actions.

Olympus® Products at of “End of Support”

As of Mar 31, 2026

Note: Some products listed on the table may not be available in your region. Products for which repair service has already terminated in the past are not listed.
